SUMMARY

Computer Science graduate with a strong foundation in software development, programming, and problem-solving. Proficient in Python, Java, and JavaScript, with practical experience in frontend development, data processing, and machine learning through academic and internship projects. Familiar with object-oriented programming, Git/GitHub, and software development practices. Demonstrates strong analytical and problem-solving abilities, with an interest in database management, system development, and technology-driven business solutions. Eager to contribute to software development and technology transformation initiatives.

TECHNICAL PROFICIENCIES

Programming: Python, Java, JavaScript
Web Technologies: HTML, CSS3, Bootstrap, Tailwind
Core IT & Software: Object-Oriented Programming (OOP), Data Structures, Software Development, Problem Solving
Tools: Git, GitHub, Vite
Technical Areas: Machine Learning, Computer Vision, Data Processing, API integration

EDUCATION

Bangladesh University of Business & Technology *January 2022 – September 2026*
Bachelor of Science in Computer Science & Technology

WORK EXPERIENCE

Frontend Developer Intern **| Elevvo Pathways**
October 2026 – Present

- Developed responsive web applications using HTML5, CSS3, and JavaScript.
- Implemented interactive functionalities through JavaScript and DOM manipulation.
- Integrated asynchronous API requests and implemented client-side form validation.
- Applied debugging and problem-solving techniques to identify and resolve software issues.
- Utilized Git and GitHub for version control and project management.
- Developed responsive interfaces using CSS Flexbox, Grid, and Tailwind CSS.

PROJECT

1. Rice MultiNet: A Hybrid Deep Learning Feature-Fusion Model for Multi-Class Rice Leaf Disease Identification

- Developed a machine learning-based classification system using Python and deep learning techniques.
- Performed image preprocessing, data preparation, and feature extraction for multi-class classification.
- Applied computer vision and analytical techniques to develop and evaluate the classification model.
- Explored model deployment concepts and documented the research as part of an IEEE publication.

2. TaskFlow – Responsive Task Management Website

- Developed a responsive task management interface using HTML5, CSS3, and JavaScript.
- Implemented interactive features and dark/light theme switching.
- Applied DOM manipulation and browser storage to manage user preferences

3. User Directory Dashboard

- Developed a user directory dashboard using JavaScript and the Fetch API.
- Integrated asynchronous API requests using async/await.
- Implemented error handling and dynamic user data rendering.

4. TechTalk – Responsive Tech Product Landing Page

- Developed a responsive product landing page using HTML5 and CSS3.
- Designed structured sections for product showcases, features, pricing, and customer reviews.
- Applied responsive design principles to improve cross-device compatibility.

PUBLICATION

Rice MultiNet: A Hybrid Deep Learning Feature-Fusion Model for Multi-Class Rice Leaf Disease Identification with Explainable AI and Web Deployment

Publisher: IEEE, 2026

IEEE Xplore

LANGUAGES

- Bangla - Native proficiency
- English - Professional working proficiency
